PROFILE

Strategic partnerships and corporate development leader with 15+ years as the business interface on complex, first-of-their-kind technology deals. As cofounder and COO of a subscription platform, I negotiated the OEM and ISV integrations with Pioneer DJ (now AlphaTheta), Serato, and Virtual DJ that embedded our service directly into their DJ hardware and software, structured the revenue-share and affiliate economics behind each, and grew the partner ecosystem from zero to 250+ through the company's acquisition by Beatport. Since then I have closed $8M+ in agreements in five months with suppliers, OEMs, and content owners across jurisdictions, and advised AI companies on partnership strategy. I structure incentives both sides can commit to, on balanced terms, model the economics with finance, scope integrations with engineering, and stay steady with senior counterparts when deals get ambiguous. A lifelong car enthusiast and regular rally driver, now focused on bringing autonomy to the road.
