PROFILE

Partnerships and business development leader with 15+ years structuring, negotiating and closing complex agreements with OEMs, platforms and rights holders. As COO and cofounder of Pulselocker, I signed Universal, Warner, Sony and Merlin, launched OEM/ISV integrations with Pioneer DJ (now AlphaTheta), Serato and Virtual DJ, raised $10.5M, and owned strategy and P&L through the acquisition by Beatport. At Utopia AG I closed $8M+ in supplier, OEM, content and technology contracts across jurisdictions in five months. I build the financial models behind a deal, find terms that work for both sides, translate business and product requirements for engineering, and stay the partner's trusted contact long after the contract is signed. My OEM work so far has been in music hardware and software; I am now bringing it to Physical AI.
